

PAY AND DISPLAY METER

These meters issue tickets for display on vehicle dashboards.

Solar powered, on-street stainless steel meters fit neatly into the street landscape. They are vandal resistant and highly secure. They accept payments by coins, credit cards and mobile phones.

PAY AND DISPLAY METER

These meters issue tickets for display on vehicle dashboards.

Solar powered, on-street stainless steel meters fit neatly into the street landscape. They are vandal resistant and highly secure. They accept payments by coins, credit cards and mobile phones.

REMOTE CONTROL OF EVERY METER

The fee changes can be set remotely from one office location without having to visit the meters on site.

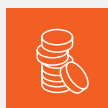

The meters automatically adjust to daylight saving times, they report via SMS to designated staff mobile phones whenever cash vaults near full and require replacement, or when ticket paper is low.

The meters communicate with their central software via wireless GPRS method. This reliable and low cost communications method enables the meters' owners to have immediate access to revenue and status reporting at the head office.

PAYMENT OPTIONS

OPERATION

Customers nominated in advance, duration of parking for a space and paid at P&D meter, using cash and credit card.

This function was known as prepayment with a receipt issued to be displayed on the windscreen with traditional enforcement.

Today Pay by Plate Meters are provided to Council with added service of digital Apps.

Customer enters via in built meter keypad, their licence plate number and nominates in advance duration of parking.

The meter may / may not issue a receipt of display on the windscreen.

All over payment for stay is charged as prepayment defines the total amount with no refund if vacating the space early.

Enforcement is the same as for P&D.

With the introduction of digital apps, customers can pay at either a P&D location, or PBP location.

If the customer uses our PARKi Pay by Phone App for a P&D meter, the location is known and the customer's account and vehicle number.

If the customer overstays the period of paid parking with no authority / conditions in the zone, to extend FOR ADDED time, enforcement violation will apply.

PARKi provides an enforcement App that collects all payments made by PARKi Pay by Phone user account holders and displays within a zone those licence late numbers which are in violation.

Similar offering is delivered by PARKi Pay by Plate where all licence plates in a zone that are paid for at a meter are now transmitted, to a server for on forwarding to our enforcement App. This enables the enforcement officer to view both payments made at the meter and PARKi within a zone for enforcement using the accounts licence plate number as primary reference.
