

## PAY BY BAY METER

These meters issue tickets for display on vehicle dashboards.

Solar powered, on-street stainless steel meters fit neatly into the street landscape. They are vandal resistant and highly secure. They accept payments by coins, credit cards and mobile phones.

## PAY BY BAY METER

Customers pay for a specific bay using the meter's numerical keypad.

Solar powered, on-street stainless steel meters fit neatly into the street- scape. They are vandal resistant and highly secure. The fee changes can be set remotely from one office location without having to visit the meters on site.

### SOLUTIONS

The meters automatically adjust to daylight saving times. They alert via SMS to designated staff mobile phones the status of the meter such as whenever cash vaults are near full or in the event of vandalism.

CDS offers EMV compliant credit card payments and Pay-Wave.

Management can use the collected data to analyse:

- revenue collected by meter
- turnover by time, date, meter and zone
- status of bays the purpose of enforcement
- customer patterns by bays

This system can be used in conjunction with in ground bay sensors for real time compliance and enforcement.

### CONFIGURATIONS
